Polyboard[®] applications are only limited by your imagination

Industrial / Commercial

Van Floors

The BASF award-winning Eco-Efficiency Analysis Methodology assesses the life cycle of products or manufacturing processes from "cradle to grave" using 6 categories:

1. **Material consumption;**
2. **Energy consumption;**
3. **Health effect potential;**
4. **Risk potential for misuse;**
5. **Emission to air, soil and water;**
6. **Land use.**

Polyboard[®] is classified as a Linear Low Density Polyethylene (LLDPE), and is a top scorer in all the above categories.

Benefits

- High impact, rodent and termite resistant
- Animal kick and chew proof
- Non toxic and odourless
- Chemical and corrosion resistant
- Fungi and decay resistant
- Sound deadening
- Water proof
- Never cracks, splits or peels
- Easy to fabricate, paint or glue
- Virtually everlasting
- Eco friendly and recyclable
